DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "the end cap and inner cylindrical surface of the pressure tube forming a sealed working chamber" must be shown or the feature(s) canceled from the claim(s). Note that Fig. 2 includes an opening in the end cap (see proximally of "50"). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 28-30 are objected to because of the following informalities:

It appears that "tonable" should be "tunable".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 28-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in

Application/Control Number: 09/778,455

Art Unit: 3683

the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically, the specification fails to enable the restriction being tunable.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1 and 28-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Scotto (US 4815716).

Scotto discloses a damper comprising a pressure tube 21 a rod guide assembly 31 closing a first end of said pressure tube, an end cap 45a closing a second end of said pressure tube, said rod guide assembly, said end cap and an inner cylindrical surface of said pressure tube forming a sealed working chamber 24b said entire sealed working chamber being filled with a pressurized gas, said piston slidingly engaging said inner cylindrical surface of said pressure tube to divide a first portion of said working chamber into an upper working chamber 24a and a lower working chamber 24b, said upper working chamber and said lower working chamber being filled with said pressurized gas; a piston 28 disposed within said sealed working chamber, a first flow path 42 extending through said piston to accommodate flow of said pressurized gas between said upper working chamber and said lower working chamber; a valve body 43 disposed within said working chamber to define with said end cap and with said inner cylindrical surface of said

pressure tube a fluid chamber 25 located in a second portion of said working chamber, said entire fluid chamber being filled with said pressurized gas, said valve body being fixedly secured to said inner cylindrical surface of said pressure tube; and a second flow path 32 extending through said valve body to accommodate flow of said pressurized gas between said lower working chamber and said fluid chamber, said second fluid flow path being a continuously open flow path.

Re claims 28-30, see Fig. 2.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scotto in view of Postema et al. (US 4139186).

Scotto fails to disclose compression or extension valves attached to the piston. Postema discloses such valves. It would have been obvious to one of ordinary skill in the art to which the invention pertains at the time the invention was made to have included compression or extension valves attached to the piston of Scotto according to the teachings of Postema et al. in order to achieve required damping, see Postema et al. col. 3 lines 2-5.

Application/Control Number: 09/778,455

Art Unit: 3683

Response to Arguments

9. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin A Pezzlo whose telephone number is (703) 306-4617. The examiner can normally be reached on M-F 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Lavinder can be reached on (703) 308-3421. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
